Election/Restrictions

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 19-27, 29-30, 32-35, 37-38, 40-43, and 48-49, drawn to an apparatus, classified in class 422, subclass 198.
 - II. Claims 31, 36, and 44-46, drawn to a method, classified in class 48, subclass 61.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be used with solid reactant.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

If applicant elects group I, applicant must additionally elects the following:

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Ia. **Claims 19-27, 29, 30, 48, and 49** pertains to heat exchangers that includes a plurality of superposed metal printed circuit heat exchange plates.
- Ib. **Claims 32-35** pertains to a PCHE that separates two adjacent catalytic beds from one another.
- Ic. **Claims 37, 38, 40-43** pertains to a PCHE arranged to have a first channel permitting flow of reactant fluid from the first catalytic bed to the second bed, and the second channel permitting flow of a heat exchange fluid therethrough.

If applicant elects group II, applicant must additionally elects the following:

- IIa. Claim 31 is pertaining to introducing an auxiliary fluid at a temperature differing from that of the fluid reactant species into another discrete fluid pathway.
- IIb. Claim 36 pertains to passing fluid through second channel, the first and second being separated from one another.
- IIc. Claims 44-46 pertain to superpositioning PCHE plates such that surface structures on the metal PCHE plates form fluid flow channels between adjacent metal plates.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Art Unit: 1725

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Len Tran whose telephone number is (571) 272-1184. The examiner can normally be reached on M-F, 8:30 - 5.
